PROFESSIONAL SUMMARY

Senior software engineer with 8+ years of experience building cloud-native backends, ML pipelines and LLM platforms. Most recently led the agentic AI platform at Odin AI (LangChain, LangGraph, RAG) across a team of 12 engineers, serving 50M+ API requests a day on AWS at 99.97% uptime. Earlier work includes event-driven systems handling 10M+ daily transactions and computer-vision pipelines processing 500K+ images a day. AWS Certified Solutions Architect – Professional.

TECHNICAL SKILLS

Languages	Python, TypeScript, JavaScript, SQL, Go, C/C++
Backend	FastAPI, NestJS, Node.js, Express, Fastify, Django, Flask, GraphQL, gRPC, REST, OAuth2
Frontend	React, TypeScript
LLMs and agents	LangChain, LangGraph, RAG pipelines, agentic and multi-agent workflows, OpenAI API, Hugging Face, Pinecone
Machine learning	PyTorch, TensorFlow, Keras, BERT, LSTM, CNN, Detectron2, YOLOv5, OpenCV, XGBoost, scikit-learn, MLflow, ONNX, TensorRT
AWS	Lambda, API Gateway, ECS, EKS, EC2, EventBridge, SageMaker, S3, RDS, DynamoDB, CloudWatch, CDK
DevOps	Docker, Kubernetes, Terraform, GitHub Actions, Jenkins
Data and messaging	PostgreSQL, MongoDB, DynamoDB, Redis, Memcached, Elasticsearch, Neo4j, Kafka, RabbitMQ, Apache Airflow
Observability	CloudWatch, Prometheus, Grafana
Architecture	Microservices, domain-driven design, event-driven architecture, CQRS, circuit breaker, 12-factor apps

PROFESSIONAL EXPERIENCE

Senior Software Engineer (SDE3)
Oct 2023 – Oct 2026

Odin AI | Remote

- Led technical strategy and architecture for the AI inference and agentic platform (LangChain, LangGraph), setting product and engineering direction across 12 engineers
- Architected and deployed 18 microservices on AWS ECS and EKS handling 50M+ daily API requests at 99.97% uptime for 25K+ concurrent users
- Led migration of a legacy monolith to cloud-native services with Docker, Kubernetes and Terraform, cutting infrastructure cost by 42% and raising reliability from 95% to 99.97%
- Built a real-time LLM inference pipeline with RAG and Hugging Face, improving latency by 78% and enabling 15+ production ML model deployments
- Set engineering standards (code review, automated testing, deployment automation) that raised team velocity by 48%
- Mentored 8 engineers, ran 40+ technical interviews and cut onboarding time by 35%
- Delivered 8 major product features for 50K+ customers, generating $2.3M in annual revenue

Senior Backend Engineer
Feb 2022 – Jul 2023

ChainFlux | Bangalore, India

- Architected 15+ Node.js and TypeScript microservices (Express, Docker, Kafka) on AWS handling 10M+ daily transactions at 99.95% uptime and sub-100ms response times
- Applied DDD, CQRS and event-driven patterns, cutting code complexity by 40% and improving developer velocity by 35%
- Built observability with CloudWatch, Prometheus and Grafana, reducing incident response time from 2 hours to 15 minutes

- Led monolith-to-microservices migration, cutting deployment time by 60% and enabling teams to scale independently
- Optimized database queries and added a Redis caching layer, giving 65% faster API responses and 45% lower database load
- Mentored 4 junior developers through code reviews and testing and deployment standards

Full-Stack Machine Learning Engineer Jan 2019 – Dec 2021
TorqueVision Labs LLC | Seattle, USA (Remote)

- Engineered an end-to-end ML pipeline on AWS SageMaker (TensorFlow, Keras, PyTorch, MLflow) processing 500K+ images daily with auto-scaling
- Built a custom Detectron2 keypoint detector with 92% accuracy, cutting annotation costs by $180K a year and manual time by 80%
- Trained and deployed BERT, LSTM and CNN NLP models at 94% validation accuracy, serving 100K+ daily predictions at 99.9% uptime
- Architected a Django web app with Celery and RabbitMQ/Redis for async processing of 50K+ daily jobs, supporting 500 concurrent users at sub-200ms latency
- Improved inference speed by 55% through ONNX export, TensorRT quantization and batch processing, enabling real-time edge inference

Machine Learning Engineer and Data Analyst Mar 2018 – Dec 2018
DeepLogix Technologies | Indore, India

- Built a data pipeline processing 50K+ credit card requests daily at 99.8% accuracy across 8+ integrated external APIs
- Developed a fraud detection and AML framework (XGBoost, scikit-learn) that identified $2.5M+ in fraudulent transactions and reduced fraud losses by 35%
- Created text classification models with NLTK and scikit-learn at 90% validation accuracy for company and leadership analysis
- Optimized the ETL pipeline from 4 hours to 45 minutes through parallelization and query optimization

Web Developer Intern Jun 2017 – Jan 2018
Walkover | Indore, India

- Built 30+ responsive web pages for an ERP/CRM system serving 5,000+ daily transactions in the real estate domain
- Designed a database schema with 50+ stored procedures and 200+ optimized SQL queries, improving query performance by 30%

SELECTED PROJECTS

- **Agentic RAG engine:** tool-calling system that plans multi-step answers, retrieves from vector stores and calls external APIs through a LangGraph workflow (LangGraph, Pinecone, FastAPI)
- **AI calendar intelligence platform:** LLM assistant that schedules, reschedules and prioritizes calendar events from plain-language requests, with secure OAuth access (LangChain, FastAPI, OAuth2, OpenAI)
- **Event-driven serverless system:** Lambda and EventBridge pipeline handling 1M+ events a month with dead-letter queues and CloudWatch dashboards (AWS Lambda, EventBridge, DynamoDB, Terraform)

EDUCATION AND CERTIFICATION

Bachelor of Engineering (B.E.), Computer Science Aug 2014 – Aug 2018
Acropolis Institute of Technology and Research, Indore | CGPA 7.0 / 10.0

AWS Certified Solutions Architect – Professional 2026
Amazon Web Services
